

JEONGJUN LEE

123 Cheomdangwagi-ro, Buk-gu ◇ Gwangju, 61005, South Korea

+82 10-4678-1715 ◇ buzzi0825@gmail.com

EDUCATION

Gwangju Institute of Science and Technology

March 2023 - Present

Electrical Engineering and Computer Science BSc expected in February 2027

Research Intern, focusing on theoretical machine learning and emergence of intelligence.

DATA ANALYTICS SKILLS

Programming Languages

Python, C/C++, MATLAB

Python Packages

Matplotlib, Numpy, Scipy, PyTorch, JAX

Software & Tools

HTML, LaTeX

RESEARCH EXPERIENCE

ACSL Autonomous Computation Systems Lab, GIST

April 2024 - June 2024

Research Intern

Gwangju, South Korea

- Studied works extracting 3-dimensional representations from 2-dimensional images using Neural Radiance Fields (NeRF).

Data Science Lab, GIST

May 2025 - Present

Research Intern

Advisor: Prof. Sundong Kim

- Developing a framework of intelligence in order to explain complex emergent properties of intelligence, drawing from foundations of statistical physics and active inference.
- Proposed a forcing condition of an environment where simple prediction can lead to identification in world model learning problems.
- Work accepted to the Epistemic Intelligence in Machine Learning (EIML) Workshop at ICML 2026; preparing the camera-ready version and poster.
- Selected, GIST AI Graduate School Creative Fusion Competition (AX Challenge), Research Track, beginning in June 2026

PUBLICATIONS

Jeongjun Lee, Laura Mascarell, Lancelot Da Costa, Ukyo T. Tazawa, Sundong Kim. “When Prediction Is Not Enough: Identifying Hidden Structure under Partial Observation.” *Epistemic Intelligence in Machine Learning (EIML) Workshop, ICML 2026*. 2026

EXPERIENCE

GADA

Founder

April 2023 - August 2025

Gwangju, South Korea

- Founded an early-stage venture and led a 3-person team; designed a travel-planning agent and developed the product concept and brand.
